NORTHSTAR

Taking the Complexity out of Dentistry

IMPLANT LEVEL I

This is a comprehensive program designed to familiarize the clinician with the simplicity of single tooth replacement. This course will teach the clinician to successfully and predictably incorporate implant services into their practice. You will learn basic implant applications, delivery systems, and problem solving techniques, both pre and post-operatively. You will also learn the essential steps in obtaining predictable aesthetics and function. Upon completing this course, you will be able to successfully present, gain acceptance for, place and restore single tooth implants. This is a hands on course featuring live surgeries.

Getting Started

- Value of implants for patients and doctors
- Differentiating the many implant systems
- Placing and restoring dental implants

Gaining the Vision

- Diagnosis of the "can do" case vs. the referral case
- Comprehensive care and how implants play a role
- Restoring single tooth, multiple tooth and the edentulous case

Communication and Acceptance

- Gaining patient acceptance
- Gaining financing and the role of insurance
- Motivating team members
- How to refer competently

Highlights

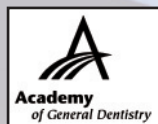

- Live surgeries
- Hands on exercises
- Presentation of new technologies and techniques

Correlation

Bring a current case with Panorex and models with bite registration. We will treatment plan your case as a group.
